

Climbing equipment

(technical specification)

J6101

1- The 168,3mm diameter posts are made of painted galvanised steel.

2- The fixing collars are made of regenerated PA6 polyamide.

3- The coloured panels are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

4- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

5- The net fittings are made of polyamide. The fittings are composed of two distinct parts for ease of maintenance of individual strands.

6- The chains are made of stainless steel.

7- **The rubber ring** is a monobloc element made of polyethylene with an outside diameter of 70cm and inside diameter of 45cm.

8- **The porthole** is made from 8mm thick methacrylate (PMMA).

9- **The climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

10-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
