

Fun panels & Sound and musical games

(technical specification)

J3442

1- **The posts with average diameter 120 to 140mm** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

3- **The handles** are made of very strong polyamide plastic.

4- **Plastic parts** are made of injected polyamide.

5- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
