

# ACTI'Fit

(technical specification)

J37103

1- **The 102mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance.

2- **The tubes** are made of 40mm and 33mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

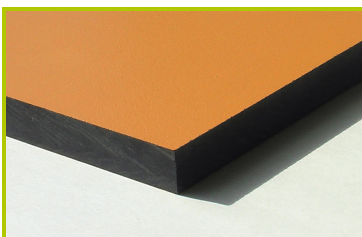

3- **The tubes used for the Parallel bars and Suspension bars** are made of electro-galvanized steel (diameter 34 mm) and stainless steel (diameter 40 mm), coated with epoxy paint. Electrogalvanization ensures corrosion resistance and provides a high quality finish. Stainless steel guarantees the longevity and robustness of the equipment over time.  
The epoxy paint ensures better grip.

4- **The caps** are made of painted aluminium (A) or rotary moulded polyethylene (B).

5- **The fixing collars** are made of painted aluminium.

6- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

7- **The Central Column seating** is supported by a painted galvanized steel frame structure.

8- **The Balancing board** is fitted to a galvanized steel post, diameter 114 mm. A ball and socket joint ensures ease of movement.

9- **The Punching ball** is made of polyurethane foam. The fixing system is made of stainless steel.

10-**The Punching bag** is made of polyurethane foam.

11-**The Runner rolling bars and surrounding frame structure** are made of stainless steel.

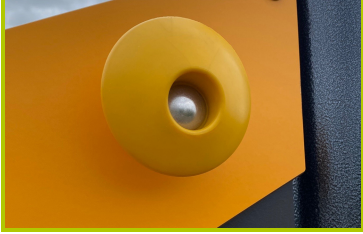

12-**The Rowing machine seat** is made of rubber. The handles are made of PVC.

13-**The stainless steel rotation system** is equipped with bearings.

**14-The smartphone holder** is made of polyamide for its strength and rigidity.

**15-The Coat Hook** is made of polypropylene.

**16-The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
