JACK IN THE BOX NURSERY - SL1 2BJ

SOVEREIGN
Bringing Imagination into Play

Following a recent Sovereign inspection, the nursery identified the need to improve its outdoor play area. The project involved the removal of an existing outdoor play pirate ship and raised playhouse, which were no longer suitable or safe for use. In addition to the removal, the nursery required the area to be made safe and level to meet safety standards for children's play.

» I met with Carly at the nursery to discuss their plans for refurbishing the outdoor play spaces, which included removing old equipment and selecting new features. The nursery chose The Brig, Grass Green Rubber Mulch for the safety surfacing, and a new Play Lodge to replace the existing structures. These updates have transformed the area into a dynamic, engaging space where children can continue to enjoy outdoor learning and play.
