

CASE STUDY

CRUGAN HOLIDAY PARK— LL53 7NL

Park Manager Mark Williams approached us for a quotation to replace the existing play area at Crugan, a holiday park that forms part of a larger group for whom Sovereign has delivered multiple projects over several years. In preparation for the installation, the park team carried out all removal works themselves, allowing us to commence promptly and ensure the new play area was completed within a tight window, between the Easter break and the May half-term holiday. The project was completed on time and the client was highly satisfied with the outcome, leading them to request further quotations for potential works at their other sites. The park now features an exciting array of new play equipment, including a bespoke Connect Tower, Zip-line, Tree Top Tangle Trail, and a selection of timber swings with varied seating (basket, flat and cradle), creating engaging new spaces for families to enjoy throughout their visit.

» FEEDBACK

What were the reasons for starting your project?

The old play park was aged and becoming a bit of a H&S issue

How did you discover Sovereign and why did you choose us?

Our old play park was from Sovereign

What was your experience of our design and installation process?

Process was great and Andrea was very helpful all the way. The layout was changed during installation which everyone from Sovereign was very positive and helpful with

How has our equipment impacted or benefitted your school/organisation?

Our customers are very happy with the new play park, which also provides a great impact when driving onto park

What was your overall experience of having Sovereign fulfil your project?

Really positive and helpful with aftersales as we are currently asking for advice on cutting grass around the posts

» "Great service from beginning to end including planning discussions and fitting the play park."
