HOWELL'S SCHOOL - CF5 2YD

SOVEREIGN
Bringing Imagination into Play

Howell's School planned to refurbish their Nursery & Early Years outdoor play areas to create a more engaging environment. This included renewing the wet pour surface with a road track, repairing existing wooden equipment, adding new play structures, and linking areas with screens and imagination stations.

»» "The school sought to refurbish its Nursery & Early Years outdoor play areas to enhance the children's play experience. After discussing various options, they decided to proceed with a wetpour roadway with artificial grass, a nursery sandpit, and several activity panels to encourage creative and interactive play. A quote was provided based on these selected improvements, and the school moved ahead with the upgrades to create a more dynamic and stimulating outdoor environment."
