

## Dizzy 6020-072

Designed with excitement and inclusivity at its core the flatbed Dizzy, with its dual axis bearing arrangement which facilitates rocking whilst spinning challenges the users to stand, sit or lie on the bed. A roundabout that helps to develop core strength. Less able bodied users will find the transition easier and the machine recessed hand and foot holds help with stability. It can help children with autism increase vestibular stimulation whilst helping with their kinaesthetic awareness.

## Play Value

Balancing

Rotating

Agility

Coordination

## Technical Details

User Range:	Early Years to Adult
Footprint Required:	5500mm Diameter
Surfacing Area:	24 m <sup>2</sup>
Free Height of Fall:	1000mm
Floor Material:	High Density Polyethylene (HDPE)
Handgrip Material:	Mild Steel
Painted Pre-treatment:	Shot Blasted & Thermal Zinc Sprayed
Polyester Powder Paint:	Non-Lead & Non-Toxic
Standard Fixings:	Anti-Theft & Corrosion Resistant
Heaviest Part:	Approx. 47.5 kg
Total Weight:	Approx. 95 kg
