

THE YOUNG EXPLORERS RANGE

Designed with an emphasis on maximising play value and incorporating a wide range of physical challenges, the Young Explorer Range of modular play systems is dynamic enough to challenge children of varying abilities within the under seven age group. Each multiplay activity unit combines the finest natural play grade timber with ropes, steps and ramps arranged to replicate tree climbing, rope swinging and crawling. The platforms and space beneath offer significant opportunity for role play and den creation as well as shady spaces.
