# THE XS CYCLONE RANGE

The XS Cyclone range of multi-play systems offers endless play value. The units incorporate the Wicksteed 'Outrigger' play system and have been designed with modularity in mind. The Outriggers and Towers can be connected with a range of bridges across variable heights - offering a progressive challenge for all users.

The **Tropo** is a single tower multiplay unit with a huge foot-hole climbing wall and a bannister slide. Its compact size makes it perfect for any sized playground.

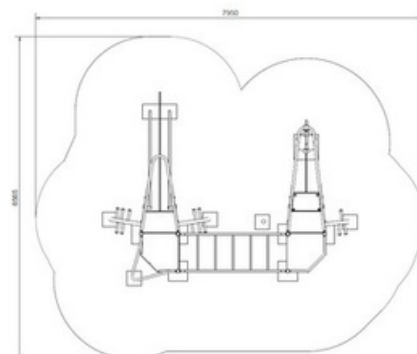

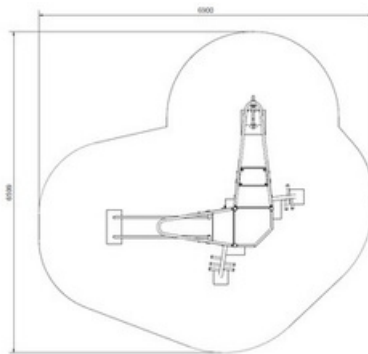

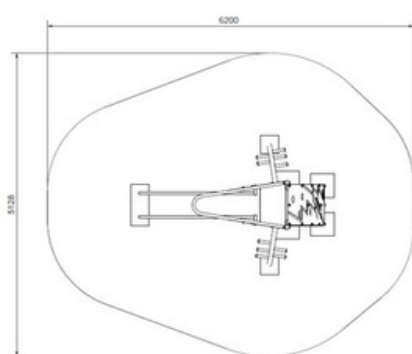

The **Baroc** is guaranteed to add some magic to the playground with its optional colour themes, including green, yellow and blue. The Baroc is part of the modular 'Outrigger' play system, designed with modularity in mind.

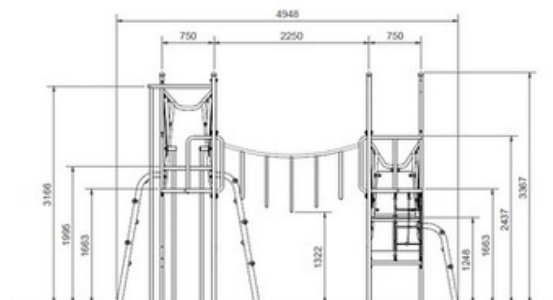

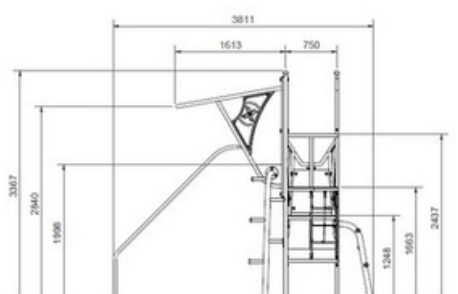

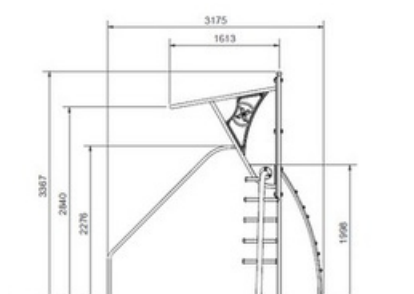

The **Synop** is a 2 tower multiplay unit, including a bannister slide outrigger, an access climber and a twisted bridge - perfect for advanced adventurers. There is never a boring moment with the Synop.
