

Case study | Regeneration

STONEHENGE NATIONAL HERITAGE SITE

 **NatraTex**[®]
Cotswold

NatraTex® Cotswold was selected for use at the iconic Stonehenge visitor destination as part of a regeneration project to enhance the overflow car park and surrounding visitor routes. Situated within walking distance of the world-renowned monument, the scheme required a high-quality surface that would respect and complement the surrounding landscape.

The natural buff tones of NatraTex® Cotswold were chosen to seamlessly blend with the environment, providing a sympathetic finish appropriate for this prestigious heritage setting. The decorative asphalt surface delivers a refined, natural appearance while maintaining the durability required for a high-traffic visitor area.

To support the contractor programme and minimise disruption, NatraTex® was manufactured out of hours, enabling the resurfacing works to be completed overnight. This ensured the project was delivered efficiently while maintaining access for visitors to one of the UK's most important historic sites.

If you would like to know how NatraTex® can enhance your scheme, email today: enquiries@natratex.co.uk
