Collaborating with clients across the construction and landscape industries over the last 30 years, MCM is renowned for sourcing and supplying construction, highways, infrastructure and landscape projects with British Standard topsoils, high-performance blends, aggregates and concrete mixes.

The team also work closely with clients, providing fully audited construction waste services from inspection and classification to removal and disposal of hazardous and non-hazardous materials.

# SOILS

MCM supplies soils for landscape and construction schemes across the South East and nationwide. With British Standard topsoils, subsoils, and high-performance soils across our range, MCM offers a soil solution for every eventuality and purpose.

Working with independent soil scientists, MCM can provide certification on request and can select the right soil for the right ground preparation on nationwide construction projects.

## SOILS & COMPOSTS

- BS3882 topsoils
- BS8601 subsoils
- PAS100 compost
- Natural as-dug soils
- Screened soils
- Mushroom compost

## HIGH PERFORMANCE SOILS

- Rootzone
- Low fertility soils
- Ericaceous soils
- Urban tree soils
- Bioretention soils

## LIGHTWEIGHT SOILS

- MCM lightweight soils
- Intensive green roof substrates
- Extensive green roof substrates
- Lightweight green roof subsoils

Soils | Aggregates | Waste

# AGGREGATES

MCM supplies aggregates for construction, landscape and highway schemes across the UK. Whether primary aggregates, sourced from local quarries to minimise carbon footprint, logistics and emissions, or recycled or secondary aggregates, MCM source material close to your site. Classifying, recycling and reusing where appropriate, this minimises construction waste, reduces mileage and fuel costs, simplifies the supply chain and contributes to a healthier environment.

## CONSTRUCTION AGGREGATES

MOT Type 1  
IBA aggregate  
Shingle  
Ballast  
Gabion stone  
Self-binding gravel  
6f2/6f5 recycled  
2/6mm horticultural grit  
2/6mm permeable  
MOT Type 3  
Hydraulically Bound Material  
Rock salt

MOT Type 1 x  
6C aggregate  
Type B filter aggregate  
Type A filter aggregate  
6l aggregate  
6N aggregate  
Class 1A aggregate  
Track ballast  
Road planings

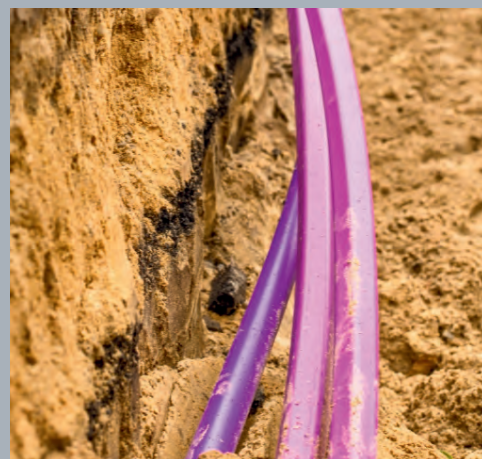

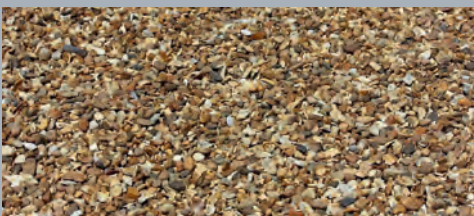

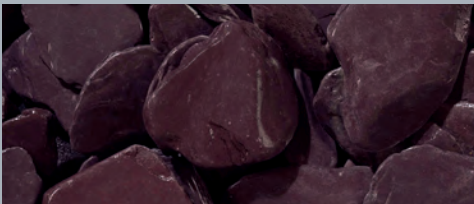

## LIGHTWEIGHT AGGREGATES

ARGEX lightweight aggregate  
LECA lightweight aggregate

## DECORATIVE AGGREGATES

- |                          |                      |
|--------------------------|----------------------|
| Gabion stone             | Boulders in colours  |
| 2/6mm horticultural grit | Black basalt         |
| Scottish cobbles         | Granite dust         |
| Slate in colours         | Chippings in colours |
| Yorkstone                | Gravel in colours    |
| Paddlestones in colours  | Limestone            |
| Tumbled sandstone        | Cambrian flint       |
| Pebbles in colours       |                      |

---

## FILL AGGREGATES

- |                         |                    |
|-------------------------|--------------------|
| IBA aggregate           | 6I aggregate       |
| 6C aggregate            | 6N aggregate       |
| Type B filter aggregate | Class 1A aggregate |
| Type A filter aggregate |                    |

---

## SANDS

- |              |                   |
|--------------|-------------------|
| Cabling sand | River-washed sand |
| Sharp sand   | Playpit sand      |
| Soft sand    | Fill sand         |
| Reject sand  | Urban tree sand   |

# CONCRETE

---

Providing the full 24/7 site service, MCM use highly specified volumetric trucks, computer-calibrated and approved on service contracts across the country. These on-site, ready-mix concrete solutions and options mean no waste, no return loads, precise ordering and billing.

For drum deliveries, the concrete is specified in its exact wet mix and collected from the plant and supplied in drums which spin continuously until they tip on site.

---

## CONCRETE MIXES

- C35/45 and C40/50 industrial concrete
- C32/40 HGV park concrete
- C28/35 retaining wall foundation concrete
- C25/30 ST5 foundation concrete
- C20/25 ST4 bases concrete
- C12/15 ST3 kerb concrete
- C16/20 trench fill concrete
- C8/10 ST1/ST2 flooring concrete

---

## OTHER CONCRETE FORMS

- Cube testing
- Foam concrete
- Waterproof concrete
- Liquid screed
- Water-reducing admixture (WRA)
- Screed
- Air-entraining admixture (AEA)
- Fibre-reinforced concrete

---

## OTHER DELIVERY TYPES

- Line/Boom/Trailer Pump Hire

# CONSTRUCTION WASTE MANAGEMENT

MCM ensures your inert or contaminated construction waste is checked, classified, disposed of or recovered, ensuring that your site is managed cost-effectively.

Bridging the gap between your construction waste management and our approved licensed facilities and committed to circularity in construction, MCM take care of the testing, reporting and compliance.

## WASTE REMOVAL

- Asbestos
- Invasive Plants
- Inert waste (muckaway)
- Non-hazardous waste
- Hazardous waste

## WASTE DATA REPORTING

- Waste tracking
- CO2 emissions
- % waste breakdown by haulier
- Monthly/quarterly/annual reports

## RAPID TESTING

- Site callout
- On-site sampling
- Next day results and guidance
- Full suite testing to validate results
- Report for removal, remediation or recycling

# LOGISTICS AND EQUIPMENT HIRE

Selecting the best logistics option is just as important as choosing who supplies your materials. At MCM, we provide both the materials you need on site whilst managing how and when it gets to you most effectively.

Simplifying your supply chain, MCM manage all elements from the materials themselves to the logistics options and plan. This means you can expect deliveries when and where you need them, safely, on time, with an eye on efficiency and budgets.

# WHAT OUR CUSTOMERS SAY

## Never let us down

"MCM is a very reliable supplier and has never let us down, even if we are arranging materials at the very last minute. The team will do everything to get materials on site the following day. I have really enjoyed working with you all and am always impressed when you check in to ensure our materials have been delivered to site. Quite simply, you're the best aggregate supplier."

**Ernesta Valaitis**  
Construction Manager  
Deep Group London

## Last minute orders

"MCM have been our 'go to' for soils, aggregates and muck away for a number of years now. We favour MCM as they offer a responsive service as well as some of the best availability in the industry.

We receive an unfaltering level of customer care with a dedicated account manager just one phone call, WhatsApp or text message away. MCM have helped us numerous times with logistical issues and last minute orders and we look forward to many more years of working together."

**Ed Wright**  
Managing Director  
Wright's Landscapes SE

## Quick to respond

"Our client expectations focus on meeting delivery targets and hitting technical specifications, every time, every load. Our collaboration with MCM has always been a very successful one in this regard, from our initial enquiries for British Standard topsoils and subsoils, certification and any site testing or verification that we might need. Always quick to respond, either to the enquiry or on site, every member of the MCM team can offer an informed and helpful response – something we really appreciate as it keeps project timescales, traceability and timescales on track."

**Sean Moran**  
Chief Buyer  
O'Halloran & O'Brien

## Soils, sub-base and disposal needs quickly and cost effectively

"MCM's Enviro Blend type 1 proved to be just the solution we were looking for.

The team at MCM helped to resolve our soils, sub-base and disposal needs quickly and cost effectively."

**Rudi Swanepoel**  
Commercial Director  
Landform Consultants

## Continuity and Flexibility

"GreenBlue Urban have been working with the MCM team for about 5 years. Where they really excel is with response times – they can turn an enquiry around very quickly, often to our Central London schemes, whether it's one bag, loose or grab loads. We have the continuity, flexibility and assistance of Josh as our account manager, but also get the same high level of service from Darrel and the rest of the team. As is common in the landscape industry, we're often the last on site, with a tight timeframe and projects nearing deadline, so these rapid response times and the support offered by MCM is vital – especially with their next day deliveries. This is hugely beneficial to us in meeting deadlines, managing and exceeding our customer's expectations and reflecting positively to our customers and for our own service and satisfaction goals."

**Arran Bowie**  
Operations Director  
GreenBlue Urban

## Always professional in their approach

"We have worked with MCM-SE on many various projects over many years, we have found them to be always professional in their approach and eager to assist. They have a large range of products and can be used as a 'one stop shop' which is ideal in the varied world of landscaping."

**Darren Skidmore**  
Director Skidmore's of  
Hertfordshire
