A Single Limited Company manufacturing Sign Systems, Notice Boards and Information Displays exclusively in the UK

Welcome

SSL modular sign and display systems are used throughout the UK and Worldwide, and are renowned for:

- > Innovative design and functionality
- > Flexibility
- > Superior build quality
- > Ease of installation

With 40,000 signs and displays manufactured each year, these systems can be used in isolation, or combined to create both popular and more unique sign-display solutions - see the images below for examples of these.

Our signs will enhance any location - the most prestigious office development, retail centre, hotel, school, hospital or business park.

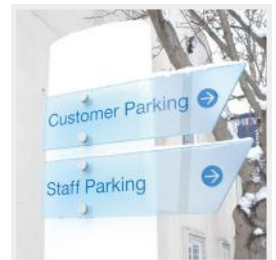

Continuous research and development has delivered new innovative designs and solutions, such as solar powered illumination within System N Notice Boards, which is not only kind to the environment but often costs less to install and operate than mains power.

SSL modular sign and display systems are sold and distributed through a international network of sign-making companies.

Systems = it's why we're unique

Because all of our products are systems, and are modular and inter-changeable by design, we can make both popular and unique sign-display **solutions** that are tailored to suit each requirement...

Systems = for a signage scheme

Combine our **systems** for the wayfinding solutions required in a co-ordinated signage scheme...

The Systems

All systems can be made suitable for internal or external use

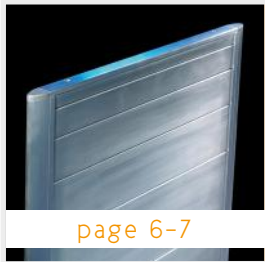

System X – modular panel signs

Brands: Post & Panel, Flush Panel

- > Superior durability and vandal resistance
- > Double-sided graphics
- > The flexibility to add or subtract panels

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting & Suspended
- Lectern style

System i – mini modular panel signs

Brands: Infotex, STAX

- > Professional, easy to use, small format signs
- > Directory signs with easy to update panels
- > Can create a full range of interior wayfinding signs

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting & Suspended
- Lectern style

System C – subtle curved panel signs

Brands: Infocurve, Infocurve Lite

- > Stylish and chic curved signage
- > Double-sided graphics
- > A statement of prestige

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting & Suspended
- Lectern style

System N – premium notice board displays

Brands: Lynester

- > A secure way to display notices and information
- > Update information quickly and easily
- > Superior weather and vandal resistance

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting & Suspended
- Lectern style

System P – affordable poster displays

Brands: The Avenue

- > Professional poster display using a front loading poster insert
- > A secure, cost effective way to display multiple notices
- > Easy fixing directly to other signs including aluminium panels

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting & Suspended
- Lectern style

System F – fingerpost signs

Brands: Fingerpost

- > Double-sided, multi-direction wayfinding signage
- > The flexibility to add or subtract finger arms at a later date
- > Numerous tailoring options and ability to combine with other systems

- Wall mounted
- Post mounted
- Rail mounted
- Monolith style
- Projecting
- Lectern style

For our **Papyrus** paper insert signs (as photo) and a wide range of other stand alone signs and displays (including glazed notice boards, pin boards, plain and printed whiteboards, outdoor schools boards and changeable letter boards), please see page 16 (back cover).

System X – modular panel signs

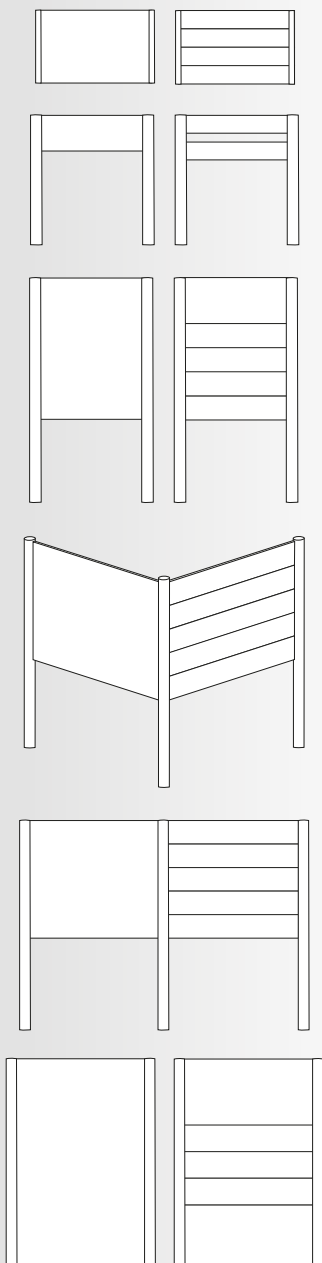

System X, which includes both the Post & Panel and new Flush Panel products, is a modular sign system that combines single or multiple double-sided panels, with a range of aluminium posts, or a set of side tracks for wall and rail mounting.

Within a traditional Post & Panel sign, panels are centre recessed to the post using infill. In our new Flush Panel product, both sides of the panel are aligned to the front edge of the post using a brand new 80mm deep extrusion, to create a double-sided tray style sign (for more details see page 5 opposite).

Choose System X for:

- > Superior durability and vandal resistance
- > Double-sided graphics
- > The flexibility to add or subtract panels easily

X10

Front access Multi-posts

Remove or replace panels from any level of your sign without removing or dismantling it. Simply remove the post face and unscrew the panel(s) required. Available in 90mm round & 80mm square posts, this is a unique advantage on large post and panel signs.

X11

NEW Flush Panel

A visually neat and cost-effective way of achieving a double-sided tray style sign. Available with D-shape Side Track or with a 80 or 90mm post option.

X12

Panel Options

All panels are double sided. Standard panel heights are 100 / 150 / 200 / 250 / 300mm. Fabricated panels are used for custom sizes.

Mounting Options

- > D-shape Side Track (wall / rail mounting)
- > 6 post types as shown below
- > 90° and 180° double slot round posts
- > Special front access posts - see above

Finial Options

- > Cast aluminium, for 90 and 76mm round posts

A = internal fitting (90mm Monopole only)
 B = external fitting (76mm post only)
 C = external fitting (76 and 90mm posts)

Other finial styles available on request

Other Options

- > Wide range of BS and RAL colours
- > Cut or printed vinyl graphics
- > Flush mode (see description above)
- > Post embellishments
- > Available in bar length for converters

System i – mini modular panel signs

STAX

One half of System i, is the STAX modular sign system, which uses a wide range of interchangeable components to create single and multi-panel signs, for desk, door or wall mounting, and suspended or projecting use. The STAX system is a 2-in-1 system, in which the same reversible panel can be used in 'Face' mode – graphics applied direct to the panel, or 'Insert' mode – graphics added to an insert that slides into the panel – perfect for Braille & Tactile signs.

- > Suspended use

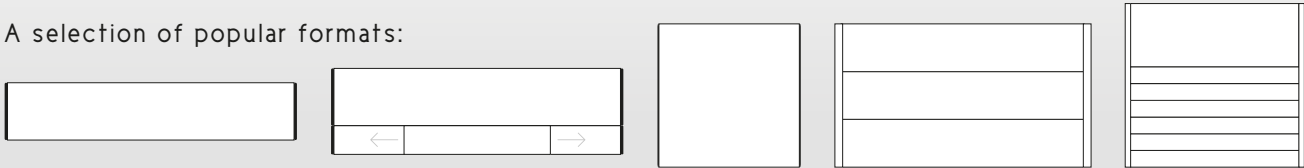

STAX Options

- > A wide range of BS and RAL colours + Satin Silver, Polished Silver & Gold
- > Cut or printed vinyl graphics

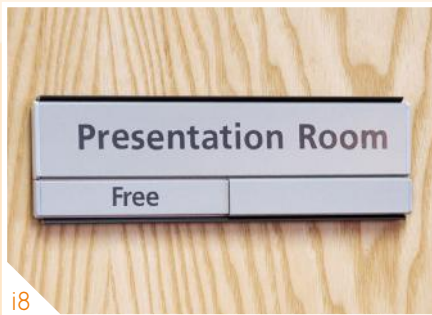

infotex

The other half of System i, is the Infotex modular sign system, which also uses a range of interchangeable components to create both single and multi-panel signs for desk, door or wall mounting, and suspended or projecting use. The Infotex system offers a wide range of panel heights from 20mm to 160mm, complete with two styles of directory sign edging, the minimalist flat-frame, and the elegant, curved D-frame.

System C – subtle curved panel signs

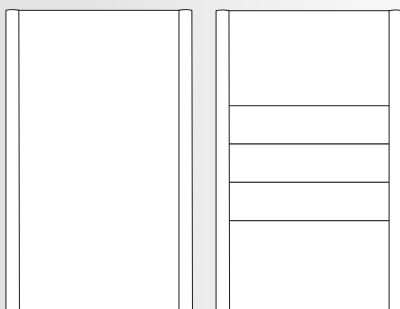

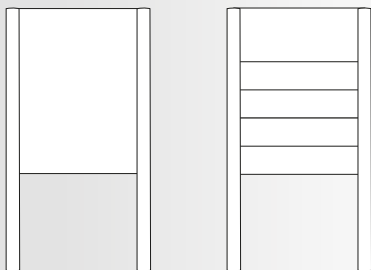

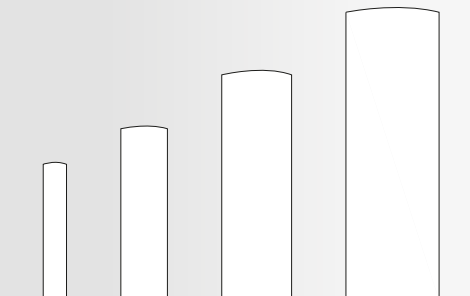

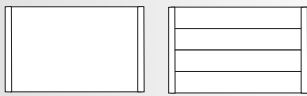

System C, which includes both the Infocurve and Infocurve Lite products, is a modular system which produces subtle, curved faced signage. Manufactured as single or double-sided, for use with aluminium posts or a set of side tracks for wall and rail mounting.

The curved panels fit underneath the edge of the posts or side tracks for a seamless finish. For smaller signs we offer sleek one piece signs (with no visible joints or fixings) in 100, 200, 300 and 400mm widths. All other sizes are made to order, usually based on a width of 600, 750, 900, 1200, 1500 or 2000mm.

Choose System C for:

- > Stylish and chic curved signage
- > Double-sided graphics

Sign Options

All signs are double-sided. One piece signs are available in 100 / 200 / 300 / 400mm widths. Larger sizes are made to order with a pair of Side Tracks or posts.

Mounting Options

- > Curved Side Track is used for wall mounted, rail mounted, and suspended versions (when one piece widths are not suitable)
- > Curved posts are used on post mounted and monolith versions
- > Brackets available for projecting version

Other Options

- > Wide range of BS and RAL colours 
- > Cut or printed vinyl graphics
- > One piece signs are available in bar length for converters

System N – premium notice board displays

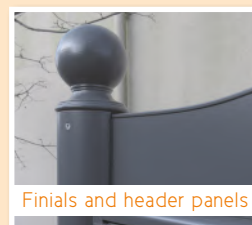

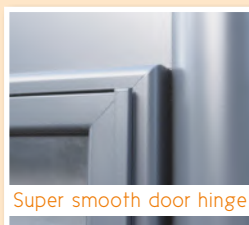

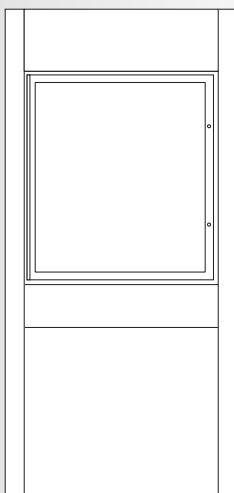

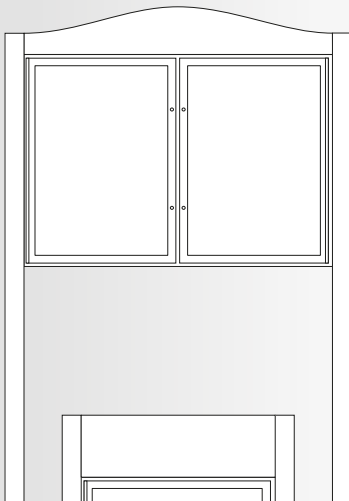

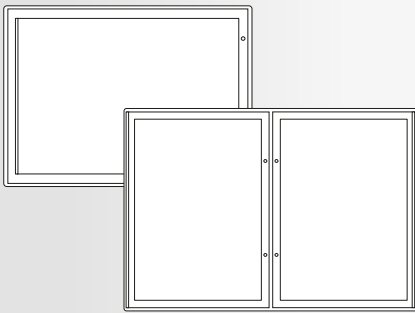

System N, which represents the Lynester product, is a premium notice board system with a wide range of mounting options to cater for every location. Display your information using an integrated pin board or magnetic panel.

System N notice boards include secure door locks, prestigious curved edging, a smooth one-piece hinge and a metal back as standard. Additional options include post finials, header panels and LED illumination (via 240V mains or solar power).

Choose System N for:

- > A secure way to display notices and information
- > Updating information quickly and easily
- > Superior weather and vandal resistance

N3

N4

N5

N6

N8

N9

Double-sided versions

N7

This is another benefit of System N notice boards. Double the space for your displays within a single unit, particularly beneficial for public areas where your notice board is seen from both sides.

Solar powered LED illumination

Solar is safe and eco-friendly, is free to run and maintain for over 50,000 illumination hours, and is often much cheaper to install than mains powered displays. Powered by daylight and activated by light and motion sensors, means there's plenty of power available for when it's needed.

N10

Size Options

18 standard sizes based on A4 paper displays, in single and double door variants. Custom sizes also available.

Mounting Options

- > WALL – screws directly into wall
- > RAIL – using traffic rail and fixings
- > POST – choice of D-shape, Round, Square or Ornate 'Langford' posts with embellishments
- > MONOLITH – add fabricated panels to post versions
- > LECTERN – add bespoke lectern stand

Finial Options

- > Cast aluminium, for 90mm round posts

A = internal fitting (Monopole only)

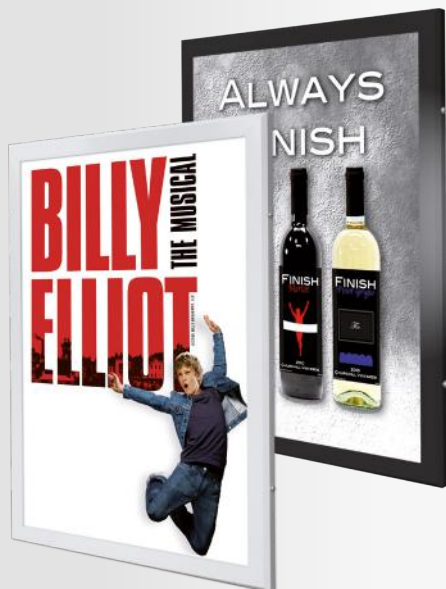

C = external fitting

Other finial styles available on request

Other Options

- > Wide range of BS and RAL colours
- > Cut or printed vinyl graphics
- > Post embellishments
- > Solar or mains LED lighting
- > Double-sided versions

System P – affordable poster displays

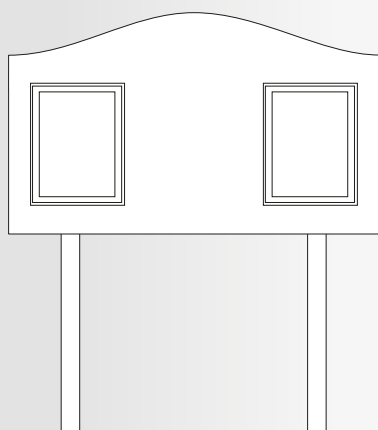

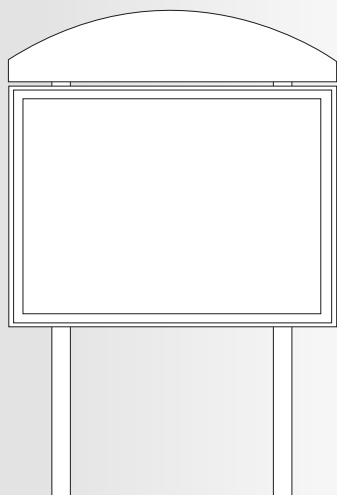

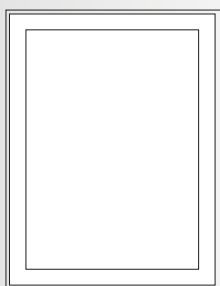

System P, which represents The Avenue product, is a robust, yet affordable poster display system designed for both interior and exterior use, which is suitable for fixing to walls, posts, railings and sign panels.

Excelling in a wide range of locations and applications, The Avenue is supplied with a fluted PVC insert for front poster display, or an integrated magnetic panel for displaying multiple notices. Highly specified, it has a weight-saving design, user-friendly locking system and a high level of weather protection.

Choose System P for:

- › A secure and cost effective way to display posters and notices
- › Easy fixing directly to other signs including aluminium panels

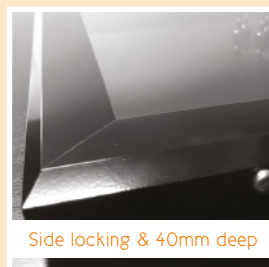

A selection of popular formats:

P5

Size Options

- > 16 standard sizes (A4 – A0), based on common poster sizes in single door format only.
- > Custom sizes also available.

Mounting Options

- > WALL – screws directly into wall
- > RAIL – using traffic rail and fixings
- > POST – round 50 or 76mm traffic posts, with plastic caps
- > LECTERN – add bespoke lectern stand

Other Options

- > Wide range of BS and RAL colours
- > Cut or printed vinyl graphics
- > Domed header panels (on arc clips)
- > Square or Arc-blended sign panels

System F – fingerpost signs

System F, which represents the Fingerpost product, is a modular, finger arm sign system made from quality aluminium components. With double skin finger-arms, this system is robust and highly durable and ideal for the rigours of public locations.

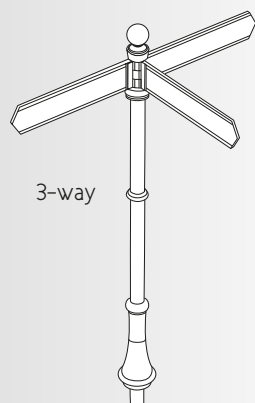

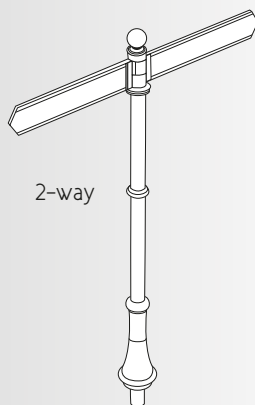

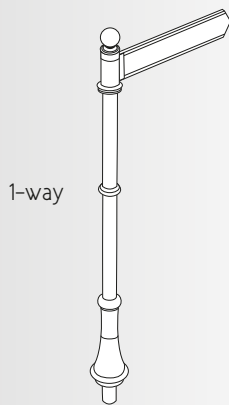

Choose from 3 finger arm styles as shown bottom right, with the option of 1, 2 or 3 at any given height† – see finger arm formats below (bottom left).

Choose System F for:

- > Double-sided, multi-direction wayfinding signage
- > The flexibility to add or subtract finger arms at a later date
- > A wide range of tailoring options and ability to combine with other systems

† restrictions apply

Finger Arm Options

120 / 165 / 200 / 250 / 300mm finger heights. Fabricated panels are used for custom shapes and sizes.

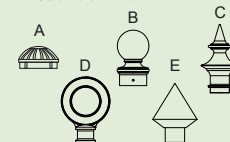

Mounting Options

- > Flat bracket for fixing to square posts or for wall mounting
- > 76mm round or 100mm square posts in either steel or aluminium (the extra strength of steel is preferable in certain situations)
- > 1, 2 or 3 way at the same height (restrictions apply)

Finial Options

- > Cast aluminium

A = internal fit on 76mm round post
 B-D = external fit on 76mm round post
 E = internal fit on 100mm square post
 Other finial styles available on request

Other Options

- > Wide range of BS and RAL colours
- > Cut or printed vinyl graphics
- > Post embellishments
- > Combine with other systems for unique wayfinding displays
