SutcliffePlay

We are excited to showcase to you our new fitness range and new introductions to our existing best-selling play ranges...

New additions to three key ranges include colourful, playful features from ground level in Minitown+, right up to the sky in Playzone+. We are also introducing a brand new modular swing set that will allow different combinations of swings from one base frame. As always, our commitment to designing and manufacturing quality play equipment continues, and all manufactured here in the UK.

British Manufacturing

We are very proud of the fact that all of our products are made in our purpose built factory in the heart of Yorkshire, England. With a local sustainable British manufacturer comes real benefits that include shorter lead times, speedy spares and competitive prices.

Employee Owned

We pride ourselves on delivering total quality and meeting the expectations of all of our customers, we all own the business, we all care.

Leading in inclusivity

Specialising in Inclusive Play, we believe that every child should have equal access to good, meaningful play opportunities by designing our equipment to enable users with a wide range of abilities, rather than just for disabled children. Inclusive play equipment so that no-one is left out.

Leading in innovation

If you are looking for something special from your play space, come and talk to us. Creating tailor made, bespoke solutions for our customers is our speciality. We are always interested in looking for new innovative ways to create good, quality play opportunities.

Sutcliffe Play Direct

The most cost effective way to purchase spare parts, and our market-leading, UK manufactured swing seats.

Minitown+

Designed to be scale appropriate for a younger age group and with a smaller footprint than the original Minitown, the new units are more budget friendly and packed with new play features suitable for children aged up to 5.

Français

Conçu pour être à l'échelle appropriée pour un groupe d'âge plus jeune et avec une empreinte plus petite que la Minitown d'origine, les nouvelles unités sont plus économiques et dotées de nouvelles fonctionnalités de jeu adaptées aux enfants jusqu'à 5 ans.

Español

Diseñado para ser escala apropiada para un grupo de edad más joven y con una huella más pequeña que el Minitown original, las nuevas unidades son más económicas y repletas de nuevas funciones de juego adecuadas para niños de hasta 5 años.

Toddlerzone+

With larger decks than all others in the market, this range is a wheelchair accessible multiplay that enhances the inclusive options now available with Toddlerzone+. The larger decks are particularly useful for children with disabilities and those requiring carers to help them play.

Français

Avec des ponts plus grands que tous les autres sur le marché, cette gamme est un multiplay accessible en fauteuil roulant qui améliore les options inclusives désormais disponibles avec Toddlerzone+. Les ponts plus grands sont particulièrement utiles pour les enfants handicapés et ceux qui ont besoin de soignants pour les aider à jouer.

Español

Con cubiertas más grandes que todas las demás del mercado, esta gama es un multijuego accesible para sillas de ruedas que mejora las opciones inclusivas ahora disponibles con Toddlerzone+. Las cubiertas más grandes son particularmente útiles para niños con discapacidades y aquellos que necesitan cuidadores para ayudarlos a jugar.

Playzone+

With the main focus of this junior aged range being to maximise challenging play, with the smallest foot print, these new products have got taller, have more theming and are packed with play.

Français

L'objectif principal de cette gamme junior étant de maximiser le jeu stimulant avec la plus petite empreinte de pied, ces nouveaux produits sont devenus plus grands, ont plus de thèmes et sont remplis de jeu.

Español

Dado que el enfoque principal de esta gama juvenil es maximizar el juego desafiante con el espacio más pequeño, estos nuevos productos son más altos, tienen más temas y están llenos de diversión.

Fitness

Outdoor Fitness has been growing in popularity and our new dynamic and static fitness station can provide a full, all body workout. Adults can actively strengthen their physical condition and improve their cardiovascular range with this free open air gym. Both elderly and younger generations can maintain their fitness and flexibility. Certified to EN16630.

Français

Le fitness en plein air est de plus en plus populaire et notre nouvelle station de fitness dynamique et statique peut fournir un entraînement complet pour tout le corps. Les adultes peuvent activement renforcer leur condition physique et améliorer leur gamme cardiovasculaire avec cette salle de sport en plein air gratuite. Les personnes âgées et les jeunes générations maintiennent leur forme physique et leur flexibilité. Certifié EN16630.

Español

Outdoor Fitness ha ido creciendo en popularidad y nuestra nueva estación de fitness dinámica y estática puede proporcionar un entrenamiento completo para todo el cuerpo. Los adultos pueden fortalecer activamente su condición física y mejorar su rango cardiovascular con este gimnasio al aire libre gratuito. Tanto las generaciones mayores como las más jóvenes mantienen su forma física y flexibilidad. Certificado según EN16630.

Essentials

Our Essentials range offers all the basics for creating a fun play space, and includes all the well known favourites.

Français

Notre gamme Essentials offre toutes les bases pour créer un espace de jeu amusant et comprend tous les favoris bien connus.

Español

Nuestra gama Essentials ofrece todos los elementos básicos para crear un espacio de juego divertido e incluye todos los favoritos conocidos.

Fun stuff

Bringing value into play...

Physical and Locomotor

Encourages movement skills; crawling, chasing, climbing, jumping, swinging and balance.

Social

Key areas where play can encourage social interaction, the building block of society.

Role Play and Imaginative

Allows opportunity to enact various experiences, experimenting with decision making on their behaviour and social interaction.

Creative

Use imagination to try out new experiences, test boundaries, develop manual skills and allow for self expression.

Inclusive

Highlights specific elements for children with different abilities.

Object

Exploration and manipulation of object through all the senses.

Tech stuff

Things you need to know...

Age

One of the first things to consider when choosing your play equipment.

Fall Height

The symbol is always accompanied by a number which signifies the Critical Fall Height and which is based on the highest designated play platform, or the height of the highest play feature that a child can stand on during normal play. What's the purpose? Used as guidance when choosing the safety surfacing.

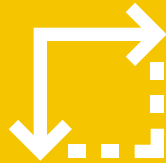

Area

This highlights the actual safety surfacing area required for each product and this is for all types of surfacing whether rubber or loose fill.

Perimeter

A measurement showing the linear meterage of the safety surfacing edge required on each product. Helpful when costing your safety surfacing.

Overall Weight

A useful measure to help with transport/carriage arrangements as sometimes lifting gear could be required at the place of delivery.

Total Height

Always helpful when planning your play space especially when planning permission might be involved.

Heaviest Part

For Health & Safety purposes it is crucial to have the correct number of people onsite to install any equipment. Knowing the heaviest part helps to calculate this.

What we do...

Consult

Every play project is unique! With years of experience of delivering projects large and small our dedicated, knowledgeable and friendly local Sales Managers are on hand to offer free advice, consultation and support.

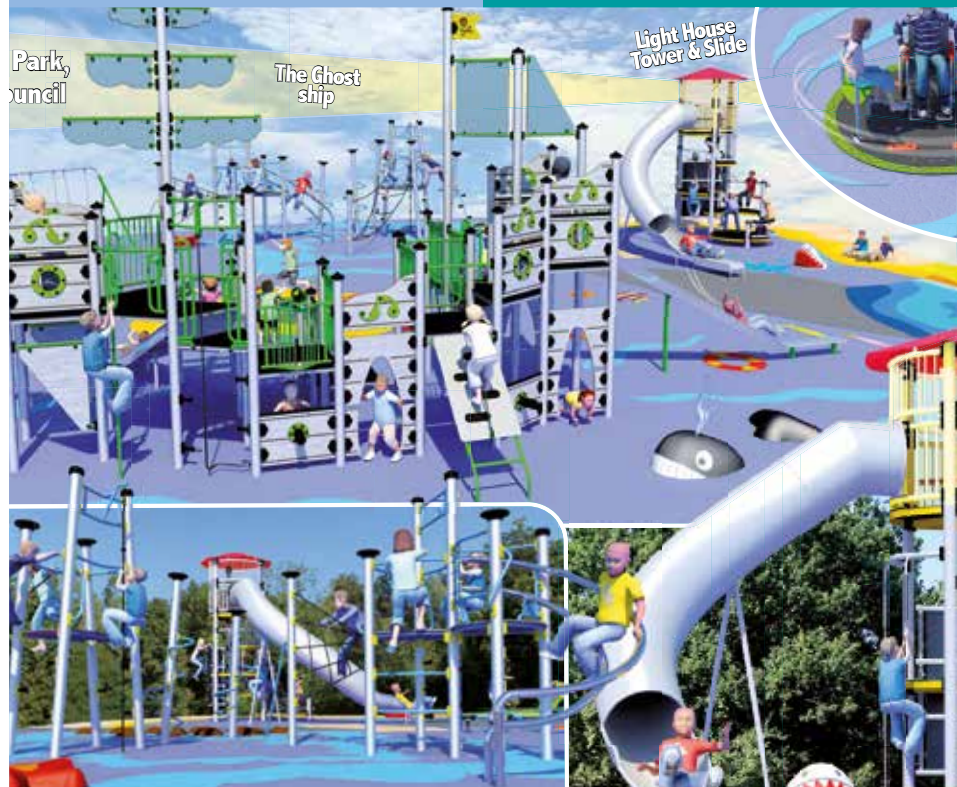

Play Space Design

Using state-of-the-art visualisation software our team of Play Area Designers transform your project vision into a suite of 2D and 3D drawings.

Product Design

Our own inhouse team of Designers are continually reviewing the trends in children's play to ensure that our products offer a wide variety of play features suitable for all ages and abilities.

Durability and sustainability a prerequisite for all new product designs.

Manufacture

From raw materials to finished product our play equipment is hand built in West Yorkshire by skilled engineers and fabricators who all take pride in putting quality first.

Sustainability

Being manufactured locally provides the most sustainable solution for our customers and the environment.

Installation

The crucial stage where projects are transformed from paper into reality. The sourcing of installation and safety surfacing services from our long-established partners to accompany the play equipment in creating the finished play space.

After Sales

As a valued customer we are on hand to offer technical support throughout the lifetime of the equipment.

We understand the need for a fast response and should a problem arise our spare parts are stocked locally in the UK.

Project Management

We maintain control of your project at every stage to ensure that it progresses smoothly, on time and to budget, with the highest standards of customer service and project quality possible.

Minitown+

Perfect for early starters

The Minitown+ structures encourage 2 key elements of a child's development.

1. Sociodramatic Play

The ambiguous design of Minitown+ offers children a play structure that can change and adapt around children's imagination. The Minitown+ structures encourage rich sociodramatic play, offering a wide array of imaginative and interactive play features.

Minitown+ has been tested to EN1176 and awarded a certificate of compliance.

2. Physical Development

Minitown+ encourages physical play offering low level platforms for small steps to climb, crawl and slide. As children in early years are insecure on their feet, special attention has been used in creating Minitown+ railings, low level platforms and sides to raised areas. Minitown+ encourages fine and gross motor skill development, helping children to develop early fundamental movements.

Minitown+ enhances play environments by providing a framework for high quality play.

As with all Sutcliffe Play equipment, we have chosen the highest quality materials and so our guarantees for this product extend 25 years with little or no maintenance.

Posts

Minitown+ has powder coated steel posts at 76mm / 3" diameter that have been positioned upright to help keep to a smaller footprint for smaller play spaces.

Panels

The detail we have been able to add to the Minitown+ unit with the HPL panels has increased the low-level play value of each unit adding even more developmental play opportunities.

Quadrangle

MTU044

This four tower multiplay is packed with playful features.

Designed to encourage children to navigate from tower to tower, across different traversing features, at each tower they will find different play triggers.

Toddlerzone+

The ultimate toddler play system

Toddlerzone+ has been designed to provide a wide range of inclusive, age appropriate play opportunities.

We believe in creating equipment with play values at the core of its design. With this in mind, all Toddlerzone+ units have been designed to help develop important social and physical skills through play.

Toddlerzone+ has been tested to EN1176 and awarded a certificate of compliance.

Sustainable and Durable

Toddlerzone+ is 'built to last' with a 25 year guarantee on the structure of the system. Aluminium uprights are used to completely eliminate the possibility of corrosion and they are light for easy installation.

The aluminium we use is also 100% recycled, is 100% recyclable and does not require any painting for the duration of its life, reducing any maintenance costs.

Large Decks

We believe that simply providing a large quantity of play features on a multiplay in isolation is not enough, they should also be accessible and playable which is why we adopt such a large deck size, a full square metre. This deck size permits a number of children to occupy a single deck space allowing them to simultaneously play with the incorporated play features whilst still giving sufficient space for other children to pass to gain access to the downstream play features.

Furthermore, this space allows children, who have maybe gone a little too far and wish to retreat to a lower play position, to pass those who are engrossed in playing elsewhere on the structure.

Play Panels

All panels are interchangeable and constructed from 100% recycled self-coloured HPL with high impact, heat resistance properties. Ideal for use outdoors with no colour fading, ideal for adding details and features that add play value.

Posts and Caps

Rubber post caps with rounded edges safely finish off each upright.

Shop

Bell

Stay to Play

DZW006

Our most inclusive, wheelchair accessible Toddlerzone+ multiplay. A shallow access ramp leads the user to a 2 metre square play deck around which the interactive play features are mounted.

The deck is large enough for buggies and wheelchairs to move between the play features and for it to be turned round to depart the unit via the same ramp. All double sided play panels have playful purpose for children on the multiplay and also those around the outside.

Playzone+

A play system big
enough to challenge

Involving children in the development of our Playzone+ range has enabled us to deliver play opportunities that children thrive for, and include a broad range of play experiences with unique features.

Physical challenges such as climbing, balancing and co-ordination, sheltered seating areas to encourage social play and group co-operation, are all key areas that need developing at a young age. Playzone+ has been built to a specification that will ensure years of use and with a range of activities that will challenge and engage through regular use.

Playzone+ has been tested to EN1176 and awarded a certificate of compliance.

Inclusive Design

Many of the units are designed to be invisibly inclusive, allowing children of all abilities to play side by side.

We have pioneered the design of inclusive play equipment and created several unique play features.

Large Decks

Our signature 9mm thick rubber decks, chemically bonded to a steel core, provide soft, slip resistant safer surfaces. Yellow and black assists the visually impaired to see different deck levels.

Post fixing positions are pre-installed at our factory in the exact positions required for easy installation. They are also supplied with easy to use safety tamper proof coverings.

Scramble nets and climbing ropes are made from hard wearing polypropylene steel cored rope. All ends are crimped with aluminium ferrels and junctions, and have round or tee connectors for added strength.

Fitness

An important part of a healthy lifestyle

Outdoor fitness has been growing in popularity for many years.

Part of the appeal of outdoor gym equipment is that it can be used by almost any age group.

Adults can actively strengthen their physical condition, with both the elderly and younger generations maintaining their fitness and flexibility. Our range of fitness stations are designed to enable four simple exercises to increase tone, strength and flexibility in all muscle groups/parts of the body. The exercise elements utilise repetitive movements and the users own weight to provide resistance.

Our four larger combination units offer a range of exercise elements with the largest station incorporating nine and the smaller, more compact ones. Our Fitness range is designed to complement the 'Body's' range of fitness units we also supply.

Gym areas

Positioning outdoor gym equipment alongside a play area encourages use by adults accompanying children playing or teenagers wanting to keep fit. It can be planned in as a destination gym area or added to walking or bike routes.

Body's

Body's equipment is manufactured from reinforced structural steel and stainless steel, all movable joints have maintenance-free bearings that are covered to prolong their useful life.

The maximum load bearing on this equipment is 155kg and none of the hinges require greasing, also reducing maintenance.

All equipment is corrosion protected by extra powder pre-coating with zinc powder after mechanical shot blasting, it is powder coated with metallised paint.

Body's is available in three colourways:

Grey & Dark Blue

Grey & Green

Grey & Pink

- Stepper/Step Jump
- Tricep Dip
- Sit Up Bench

Air Skier

PA00999

Place your hands on the handle and your feet on the platforms.
Set the unit into a left to right swinging motion.

Air Walker

PA00468

Place hands on the handles and legs on the platforms.
Straighten your back and move your legs forward and backwards.

Back Stretcher

PA00566

Stand on the footrests, lean the body on the bench, face facing down.
Hold your hands behind your head. Slowly, smoothly move, lift and lower the body.

Bench with Bike

PA00462

Sit comfortably on the bench.
Rest your feet on the pedals and start turning the pedals with your feet.

Bike

PA00476

Sit on the seat, hold the handles with your hands and place your feet on the pedals.
Move your legs like riding a bike.

Body Twister

PA00998

Place hands on the handles and legs on the platforms.
Using the hips and abdominal muscles, set the platform into a twisting movement.

Butterfly

PA00570

Sit comfortably and place legs onto the platforms. Hold both handles with your hands.

Pull the handles towards your body in a smooth movement. Return the handles to the starting position.

Chest Press

PA00437

Sit comfortably and place legs onto the platforms. Hold the handles with your hands.

Push the handles away with a strong but smooth movement, straightening out your hands.

Cross Country Skier

PA00467

Place your hands onto the handles and feet onto the platforms.

Keep upright and move your legs in a forwards and backwards motion.

Cross Trainer

PA00465

Place your hands onto the handles and feet onto the platforms.

Keep upright and move your legs in a forwards and backwards motion.

Disable Pedal

PA00574

Hold onto the handles and start turning them around.

Leg Lift

PA00469

Place hands on the rod handles at the top and avoiding a swinging movement, pull your legs up to your chest height, then lower them evenly.

Return to the starting position. or lie on the ground and place your feet on the ladder at waist level, bend the top half of the body towards the feet and then lower back to the ground.

Leg Press

PA00441

Sit comfortably on the seat. Place the legs on the platforms.

Straightening the legs, with a smooth movement push away from the device.

Pull Down Challenger

PA00431

Sit comfortably and place legs onto the platforms. Hold both handles with your hands.

Pull the handles towards you in a smooth motion.

Rails

PA00458

Stand with your back to the device with your hands bent and the elbows resting on the rods.

Lift your feet off the ground and pull yourself up so that your arms are at a right angle. Or stand in front of the device, hold the handrails with your hands.

Bending your arms at a right angle to the elbow, do push-ups.

Rider

PA00478

Sit on the seat, place your hands on the handles, place your feet on the platforms.

Straighten your legs and at the same time pull the handles together. Return to the starting position.

Romper

PA00575

Hold the handles with your hands and place feet onto the platforms. Stand upright and move your legs as far to one side as you can.

Return to the starting position and then move your legs to the opposite side.

Rower

PA01008

Sit on the seat and hold the handles with your hands, place your feet on the platforms.

Straighten the body upright while pulling the handles together.

Rules & Regulations

PA00551

Guidelines and advice for using of the gym equipment.

Stepper

PA00567

Place your feet on the risers. Bend your knees lightly and make alternate movements that mimic climbing stairs.

Your feet must adhere to the ground, keeping your body straight and the stomach muscles tight.

Sit Up Bench

PA01000

Lie on the bench and place your legs under the rods. Place hands at the side of the head.

Lift the torso slightly, bending forward and flexing the abdominal muscles then lower the body to the starting position. Repeat the exercise.

Tai Chi Spinners Large

PA00457

Stand at the front of the device. Place your hands on the handles and turn the wheel to the right and then to the left.

Tai Chi Spinners Small

PA00456

Stand at the front of the device. Place your hands on the handles and turn the wheel to the right and then to the left.

Essentials

Popular playground fillers

All studies looking at the use of swings shows that they are the most popular item on the playground.

Swings can be exhilarating or soothing, depending on the swing and the child using the swing, the child may swing vigorously or rock gently.

The physical activity of swinging is good for muscular development, stimulating the heart and lungs, which in turn promotes the flow of oxygen to the brain.

The swing is a stalwart of play and an item that children ask for without fail. The swing is one of the most common “home made” pieces of play equipment, it has evolved from a rope tied to a branch, to swing frames and chains.

Swinging in everyday life

The swinging motion is with us from before birth. The motion babies experience for 9 months in their mother’s womb creates a harmonious swing which, as they grow, feels familiar, secure and nurturing.

1 Swings can be exhilarating or soothing.

Depending on the swing and the child using the swing, the child may swing vigorously or rock gently.

2 Swings provide opportunities for progressive development.

In the early years, toddlers surrender control to the pusher. As children grow older and more self-confident they learn how to swing by themselves.

3 Swings offer children of all ages opportunities for progressive acceptable risk taking.

Children will be swinging only as high as they want at any moment in time. Swings introduce and confirm concepts of movement, velocity, relative speed, height etc. The forward and back motion helps children understand rotation, and when leaping off to see how far they can reach, they are exploring trajectories.

4 Swinging may seem to be a solitary physical activity but the most common use of swings is for socialising.

The swing provides a comfortable seat for social interaction, but always with the potential to do other things.

5 Several studies have confirmed that children spend much of their play time in gentle conversation.

Is an activity that appears to increase as children grow older. Careful observation reveals some interesting subtlety to the process. For example children may be seen to swing out of conversations when they get difficult.

This concept of children taking control of their environments is common to much of the literature about play value. Swings provide children with ample opportunity to take risks, and to demonstrate their strength, courage, and sense of mischief.

Modular Swing Set

Designed to enable a range of combinations with different seats for one, two and three bay designs. Using a base frame to start, other frames can be added to complete the desired configuration for each site.

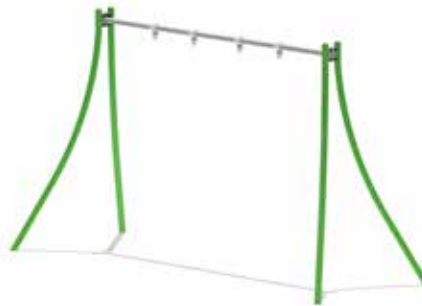

This modular system consists of front and rear end legs and a choice of three top bars to make up the desired base frame. Additional swing bays are added with a pair of centre legs, one set of end legs from the base swing are moved to end of the new. Swings will be available in two seat and four seat configurations with an additional basket swing option and each swing set will be issued with the D shackles fitted to the top bar.

Swings legs are available in green as standard and special colours are available upon request, subject to a surcharge.

Things to consider...

- When creating multiple bay combinations nest style swings should be placed at either end of the combination. NOT in the MIDDLE.
- Consider the position of Inclusive Seats, ideally place away from nest, basket and FUX or group seats when three bays are being used. Users of Inclusive Seats may require help by others to access the seat, keeping this type of seat away from a multi user seat or if possible at the opposite end of the bay combination will allow for easier access
- Don't put inclusive seats side by side... there is the potential for lateral movement if these seats are misused. The probable requirement for others to help the user get in to the seat means extra circulation space is desirable.

Choose from our selection of seats here...

Shapes

SDSWPS

The Shape Shifter uses six shapes to create a game in conjunction with wetpour or thermoplastic shapes set around the play area.

Children spin to choose a shape to run to. A number of children can co-operate to create their own games.
