

Eislinger Tor Hotel, Eislinger, Germany

Location: Germany, Eislingen

Public Space

Project details

For the Eislinger tor project, we worked with our German partner Godelmann. They produced 85m² of SCADA slabs and 52m² of DECASTON slabs. Urbastyle produced tree grates, planters, perforated slabs, slabs for the lights and personalized wall panel with the name of the hotel. The color we used for this project is nuanced anthracite gray the finishing is linear.
