- ✓ 10x10x8 cm - 175 kg/m<sup>2</sup>

The characteristic of NUEVA slabs is its homogeneous and slightly rough surface. The subtle colours of the 8 cm thick slabs are obtained by a very fine surface and thanks to a very fine blasting made with stainless steel balls that allow natural stone pebbles to give their brilliance. With its standard modern dimensions up to 100x100cm, Nueva Ferro is now a well known...
