

Architectural concrete platform edges, Central Station, Antwerp, Belgium

Location: Antwerpen (BE)

Transportation & Mobility

Project details

A new tunnel was built underneath the Antwerp Central station. Architectural concrete platform edges with ground and acid-etched finish were installed. Antwerp Central Station, one of the most beautiful stations in the world, was inaugurated in 1905. Recently the station was completely renovated and a tunnel was built underneath it with new tracks, platforms and platform edges to accommodate the high-speed rail line. The platforms were bordered with L-shaped...
