

Max Dimensions:

Height: 748,5 mm | Height of the seat: 420 mm | Width: 510 mm | Width of the seat: 385 mm
Length: 1500 mm | Weight of steel: 19 Kg

**Description:**

The structure of the bench is made of 2 strong legs in steel. On the legs, characterized by carvings in Déco style, 2 exotic wood slats shaping the seat (section: 40x180 mm) and 1 slat (section: 40x240 mm) shaping the backrest are fixed. Each leg is made in steel (60/10 thickness), on which profiles of 60/10 and 30/10 thickness are fixed. For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice. As an alternative to steel EN10111DD11, the production in corten is also available, on demand.

In this case the material is treated with a specific oxidation process.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.
