

Max Dimensions:

Height seat: 450 mm | Height backrest: 813,5 mm
Width seat: 683,5 mm | Length: 500 mm | Weight 31 kg

**Description:**

The HORIZON seat is made in steel of 60/10 thickness. The seat is made of 2 bent steel sheets, joined together through a continuous welding. Under the sheets 3 strong support plates, shaping the outline of the chair 30 mm h., are welded. The base of the metal structure presents 4 holes (14 mm diam.) to be fixed to the ground through specific bolts (not provided).

For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice. As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.
