**Description:**

Wayfinding is a totem created to offer different kinds of information, especially historic and turist contents. The information (maps, historic references, pictures etc.) is printed directly on the front panel in steel and is therefore permanent. The structure is entirely made in steel. The load-bearing structure is 50/10 thick with the base of 80/10 thickness, provided with 3 holes of 12 mm diam. For the fixing to the ground through specific bolts (not provided). The information panel has a 30/10 thickness. An optional carter, made in steel sheet (15/10 thick), can be placed behind the totem, on demand.

For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

Optional: back carter
