

Product Detail

Solar Bollard Light is a 160mm diam. bollard with anti-glare, frosted white polycarbonate lens. It is designed to look like a standard, mains commercial bollard light.

At dusk, the solar bollard light will illuminate at full brightness, and then follow a gradual dimming sequence until it reaches 30% brightness after 5 hours. From then on it will remain at 30% until dawn. Even in the dullest of weather, our solar lights will still illuminate, although they may not last the entire night cycle, which in many cases is not a necessity. Epistar LED chips (1.8W) generate a high lumen output with up to 50,000 hours life. Surface mount via the internal mounting base or use J-Bolts to root mount into wet concrete.

WEIGHT: 5.8KG

IP RATING: IP65

WORKING TEMPERATURE: -25°C ~ 55°C

MATERIALS: Die-cast Aluminium, Polycarbonate

BEAM ANGLE: 120 Degrees

ILLUMINATION TIME: Up to 23 Hours at Full Charge

LED EXPECTED LIFE: Up to 50,000 hours

DIMENSIONS: Height = 800mm Post diameter = 160mm
